EQUIPMENT & CAPEX FINANCING

Finance your next equipment investment.

Outdated equipment or limited capacity should not keep your business from taking the next step. Explore equipment financing and capital expenditure funding while preserving cash for operations.

Three structures to understand

01

Equipment term loan

Payments are generally scheduled over an agreed term. The asset, its useful life, the borrower, and any other collateral all affect terms.

02

Lease

A lease may preserve a different cash profile or address replacement cycles. Compare total cost, end-of-term obligations, and ownership provisions.

03

CapEx or draw facility

A facility with multiple draws may fit a phased equipment program. Confirm draw conditions and when principal repayment begins.

Budget for delivery, installation, training, and the time before new equipment begins producing cash.

Prepare for the conversation

- ☐ Equipment quote or purchase agreement
- ☐ Financial statements, tax returns and debt schedule
- ☐ Project budget and forecasts when capacity will change

How Alliance helps

We build the full project budget and compare loans, leases, and draw structures. We review timing, payment obligations, and the effect on operating cash.

Let's discuss your financing needs.

Tell us your goal, funding amount, and timing.
